eurogan india

Eurogan, S.L. is a Spanish company that was founded in 1964, has been consolidated after 50 years of experience in the field of reliable, quality livestock equipment.

A special effort on I+D+i has been done in order to increase the company competitiveness, developing our own technology and having our own team of engineers and fitters available for the installation and start up of farm projects, thus guaranteeing the quality of our equipment and service.

Eurogan has promoted export markets as its main aim, reaching 70% of its turnover into Export, acting in more than 30 countries.

Eurogan is focused on the design and development of every single equipment for livestock modern production. Our products have been tried and approved by our clients, who value our experience, along with our creativity and innovation.

So year after year Eurogan has been pointed as a leading company using the more modern and innovative technologies helping the Farmer.
